Education

Sonoma State University

B.S. Computer Science, GPA: 3.6/4.0

Rohnert Park, CA

Aug 2018 – May 2020

Santa Rosa Junior College

A.S. Computer Science, GPA: 3.9/4.0

Santa Rosa, CA

Aug 2016 – May 2018

Experience

Odoo

Software Engineer

San Francisco, CA

Nov 2022 – Present

- Develop and maintain features across Odoo's ERP suite — finance, CRM, inventory, and more
- Build full-stack functionality using Python/Odoo ORM on the backend and OWL framework on the frontend
- Collaborate with cross-functional teams to scope, design, and ship product improvements
- Participate in code reviews and contribute to internal tooling to improve team workflows

Tesla

AutoPilot Engineer

San Mateo, CA

Jan 2021 – Mar 2022

- Analyzed critical sensor and camera data to improve Autopilot neural network performance using a specialized software interface
- Reviewed analyzed data for correctness and improvements to maintain the highest quality inputs for the neural network
- Collaborated with the Computer Vision Engineering team to identify and resolve software interface gaps
- Led weekly team meetings on quality standards and common annotation mistakes

Projects

Accountabilibuddy

accountabilibuddy-ten.vercel.app | GitHub

- Accountability app where groups set weekly goals and contribute to a shared pot for missed goals — funds go toward a group outing
- Features per-user goal graphs, group-wide progress tracking, and session-based rounds; built with React and Next.js

Scream Reel

GitHub

- Horror movie tracker for groups — members watch, rate, and discover which scary films the group loves most; each member picks their top 3

Odoo Food Menu

GitHub

- Converts Word document food menus into a website, automatically scraping food images from the web for each item; built with Python

Kronos Time Calculator

GitHub

- Built at Tesla to calculate the correct clock-out time for an 8-hour shift around a lunch break; shared with coworkers to eliminate daily confusion

Anime Recommendations

GitHub

- Anime recommendation search engine using the Jikan API — find similar shows, search titles, and browse trending and upcoming anime

Morse Code

GitHub

- Android app built with a team of five — converts text to Morse code via vibration, flash, and sound; built in Java with Android Studio using Agile/SCRUM

Skills

Proficient: React.js, Node.js, JavaScript, HTML, CSS, Python, Java, C++, SQL, Git, REST APIs, Data Structures & Algorithms, OOP

Familiar: Vue.js, MongoDB, MySQL, OWL (Odoo), Android Studio
